KYUQUOT AND FAIR HARBOUR TSUNAMI INFORMATION

Fair Harbour and Kyuquot Tsunami Risk

For a local (offshore) tsunami:

- 7-meter (23-feet) high waves will arrive in Fair Harbour 45 minutes after the ground stops shaking.
- 13-meter (43-feet) high waves will arrive in Kyuquot 25 minutes after the ground stops shaking.

For a distant tsunami generated from Alaska:

- 5-meter (16-feet) high waves will arrive in Fair Harbour and Kyuquot.

Tsunami evacuation protocols are DIFFERENT depending on if you are in Kyuquot or Fair Harbour to study this information in great detail it could save your life.

If your location doesn't allow you to evacuate to one of the Tsunami Assembly Areas on the map then evacuate to any area that isn't shaded blue to ensure you are out of harm's way.

Fair Harbour

Local Tsunami

If you are in Fair Harbour and experience a strong earthquake that knocks you down then drop, cover, and hold on during the earthquake then immediately proceed to the Fair Harbour Tsunami Assembly Area which is located at the seacan (shipping container) behind the cabins (bring your emergency survival supplies with you as you will likely be stranded here for a prolonged period of time).

Distant Tsunami

If you are in or near Fair Harbour and experience ANY ONE of the distant tsunami signs, immediately take your vehicle and leave Fair Harbour in a safe manner.

Once you are past Zeballos you are safe from a distant tsunami:

- Unhitch your boat trailer from your vehicle and leave your boat in Fair Harbour.
- Do not attempt to remove your boat from the water.
- Arrange to car pool and ride share wherever possible to minimize congestion on the road.

Kyuquot

WHEN SHOULD I EVACUATE?

If you are in Kyuquot and experience ANY ONE of the signs below immediately proceed to your closest Tsunami Assembly Area which are the Walters Island Community Hall or Kyuquot School as indicated on the map (bring your emergency survival supplies with you as you may be stranded here for a prolonged period of time).
